Being a ski instructor and escaping the rat race was something I'd dreamed of for a while so I finally decided to quit my boring job and go for it. The programme that

ANTHONY SEYMOUR

Ski-Exp-Air offered made choosing a place to train easy. It was excellent value for money. From day 1 in Quebec I knew it was going to be great, Luc goes more than out of his way on and off the slopes to make sure everyone is happy and after just a couple of days I felt at home.

On the hill was even better, SEA coaching team went well beyond expectations, we had once in a lifetime opportunities to ski with some of the top coaches in Canada and as well as improving the mechanics of your skiing you also experience the psychological challenge of becoming a better skier. Of all the exams you take in your life for me passing Level 2 CSIA was the most satisfying so far.

If you're looking for a more personal approach to your training then Ski-Exp-Air is definitely the place to be!

PHILIP VAN EVERDINGEN

When I booked my trip with SKI-EXP-AIR I had a feeling that I made the right decision. I was right! It was the best decision I made in my life until now.

We were in a small group of 5 skiers and 5 snowboarders which was a big advantage in all different ways.

SEA program was fantastic, every day we skied with a lot of encouragement and coaching. With SEA everybody passed the level 2 ski instructor exams. The activities were super-fantastic. This was the best three month's of my life. I will come back that's for sure. After this course you can work anywhere as a ski instructor. As first Belgian I'll also say I didn't just improved my skiing, but my English too so for all non ENGLISH speakers, with the fantastic BRITS you will learn and improve a lot of English and of course you will learn a lot of swear words.

Luc, Jake, Nick I want to thanks all of you it was fantastic.

Since arriving back in England, I have been competing in dry slope slalom for Newcastle University's 1st Snowboard team. Recently, at BUSC, the annual competition between British Universities, I came 2nd in Parallel Slalom, 2nd in Slopestyle, 2nd in Pipe and 1st in GS. These achievements meant that I reigned as 'Queen of the Slopes' as I gained the most points. I have been voted in as Snowboard and Freestyle Captain for the club next year and in 2007, if all goes to plan, I will be competing in the World Student Games. All of this would not have been possible if it hadn't been for my incredible experience with Ski-Exp-Air and Seb's invaluable tuition. I learnt so so much and intensified an immense passion for the sport that will always be with me
